HT Servo to Celebrate 20th Anniversary in 2021

2021 sees HT Servo Ltd celebrate our 20th anniversary which we hope to be in more clement times.

In reality we've actually been around a lot longer with only the interruption of name changes over the years.

As a historical recap here are our previous names which some of you may recall:

Hightech Components Ltd 1976–1994

Kollmorgen Hightech Ltd 1994–2001

HT Servo Ltd 2001—to infinity & beyond !

Maybe we should be celebrating our 45th anniversary !!

Wishing all our customers, family's and friends a more convivial future and that 2021 returns to some sort of normality.

HT Servo Completes Deliveries for Motion Control Components utilised on AJAX AFV

Crew	Max weight	Length	Width	Height	Top speed	Engine
3	42 tons	25ft	11ft	9ft 10in	44mph	MTU diesel

Frameless torque motors & ruggedised brushless motors

AJAX is the next generation Armoured Fighting Vehicle (AFV) for the British Army.

AJAX will be the medium-weight core of the British Army's deployable Intelligence, Surveillance, Target Acquisition and Reconnaissance (ISTAR) capability.

HT Servo Ltd successfully completed deliveries of actuators and brushless torque motors for both the commanders primary sight and stabilised day / night gunnery sight.

Comprising 245 ship sets of equipment over a 4 year period with final deliveries completed ahead of contracted timeframe and before YE 2020

It's almost 20 years since HT Servo Ltd supplied components on another major contract for the Battle Group Thermal Imaging (BGTI) systems for Warrior and other AFV's . This shows that we have the longevity to support our customers over long term programs large or small.
