MOTION UNDER CONTROL

HT Servo Ltd is a leading supplier of motion systems and components to original equipment manufacturers, with particular emphasis in Harsh Environments such as Aerospace, Defence, Space and Subsea Applications.

HT Servo Ltd is the exclusive representative for some of the world's leading motion control companies and with the aid of our principal partners we remain at the forefront in design & supply of highly engineered, extremely reliable motion equipment.

Our motion components are used in a multitude of applications ranging from, but not limited to, positioning of Targeting Systems, EO / IRCM Directors, Radar / Sat-Com Platforms, Missile Seeker / Fin Actuation & Gimbal Systems;

Our product offering for such applications are:  
Torque Motors & Rugged Servomotors  
Electro Mechanical Linear Actuators  
Precision Planetary Gearheads  
Stepper Motors Rotary & Linear  
Feedback Devices Rotary & Linear  
Motor Controllers & Drives  
Slip Ring Assemblies

## HT Servo Attends DSEi 2021

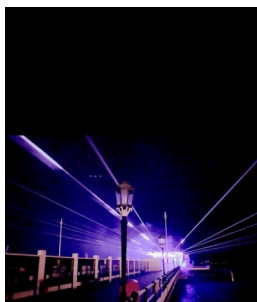

HT Servo attended this year's Defence and Security International exhibition (DSEi) at London's ExCel. The exhibition is a showcase for capabilities in Aerospace, Land and Naval arenas for global defence and security business'

It was a little quieter than previous years but it was an enormous pleasure to meet up with customers, suppliers and friends at this international show. It was also great to see a lot of hardware deployed at the show with HT Servo's motion components within the end systems on display.

We look forward to the next show in 2023

## Worthing News— 'Interactive' Christmas Light Show

An interactive laser light show at the end of Worthing pier will be ready in December in time for Christmas. The public can take turns in controlling the pattern and colours using an app on their phone.

The super lively laser beams, which can be seen for miles, will be visible from the pier's south pavilion into the night sky.
